Human Immunology

Volume 27, Number 1, January 1990

Contents

BIRGITTA S. BREUR-VRIESENDORP, JOSÉ VINGERHOED, WIM P. SCHAASBERG, and PAVOL IVANYI
Variations in the T-Cell Repertoire Against HLA Antigens in Humans 1

D. J. IZON and R. L. BOYD
The Cytoarchitecture of the Human Thymus Detected by Monoclonal Antibodies 16

DAVID ABI-HANNA and DENIS WAKEFIELD
Differential Enhancement of HLA-B27 by Interferon 33

XIAOJIANG GAO, MARCELO FERNANDEZ-VINA, WAYNE SHUMWAY, and PETER STASTNY
DNA Typing for Class II HLA Antigens with Allele-Specific or Group-Specific Amplification. I. Typing for Subsets of HLA-DR4 40

NANCY L. REINSMOEN and FRITZ H. BACH
Structural Model for T-Cell Recognition of HLA Class II-Associated Alloepitopes 51

Volume 27, Number 2, February 1990

N. VALENTIN, A. VERGRACHT, J. D. BIGNON, M. L. CHENEAU, D. BLANCHARD, C. KAPLAN, M. F. REZNIKOFF-ETIEVANT, and J. Y. MULLER
HLA-DRw52a Is Involved in Alloimmunization Against PL-A1 Antigen 73

LI ZHANG, TOBIAS R. RINKE DE WIT, SHUGUANG LI, JON J. VAN ROOD, and FRANS H.J. CLAAS
Subtypes of HLA-A1 Defined on the Basis of CTL Precursor Frequencies 80

PENELOPE A. MOREL, GLENN T. HORN, RALPH C. BUDD, HENRY A. ERLICH, and C. GARRISON FATHMAN
Shared Molecular Markers of Genetic Predisposition to Seropositive Rheumatoid Arthritis 90

CAROLYN KATOVICH HURLEY and NORIKO STEINER
DQ Polymorphism: An Analysis of DQw4α and β Membrane Proximal Regions 100

MASAHIRO MAEDA, NOBORU URYU, NORIKO MURAYAMA, HIROKO ISHII, MASAO OTA, KIMIYOSHI TSUJI, and HIDETOSHI INOKO
A Simple and Rapid Method for HLA-DP Genotyping by Digestion of PCR-Amplified DNA with Allele-Specific Restriction Endonucleases 111

WEI-YUAN YU, REBECCA WATTS, and ROBERT W. KARR
Identification of Amino Acids in HLA-DPw4bβ and -DR5β1 Chains That Are Involved in Antibody Binding Epitopes Using Site-Directed Mutagenesis and DNA-Mediated Gene Transfer 122

JERRY S.S. LANCHBURY, MARGARET A. HALL, KENNETH I. WELSH, and GABRIEL S. PANAYI
Sequence Analysis of HLA-DR4B1 Subtypes: Additional First Domain Variability Is Detected by Oligonucleotide Hybridization and Nucleotide Sequencing 136

Volume 27, Number 3, March 1990

DANIEL H. SILVERMAN, MOHAMED H. SAYEGH, CARLOS E. ALVAREZ, T. SCOTT JOHNSON, EDGAR L. MILFORD, and MANFRED L. KARNOVSKY
HLA Class II-Restricted Binding of Muramyl Peptides to B Lymphocytes of Normal and Narcoleptic Subjects 145

HÉLÈNE ZINSZNER, MICHEL MASSET, JEAN-FRANÇOIS BOURGE, JACQUES COLOMBANI, DANIEL COHEN, LAURENT DEGOS, and PASCALE PAUL
Nucleotide Sequence of the HLA-A26 Class I Gene: Identification of Specific Residues and Molecular Mapping of Public HLA Class I Epitopes 155

J. E. YENDLE, P. D. BOWERMAN, K. YOUSAF, I. M. ROBERTS, B. COHEN, L. BARBER, R. LECHLER, R. J. T. HANCOCK, and B. A. BRADLEY
Production of a Cytotoxic Human Monoclonal Antibody with Specificity for HLA-DR4 and -DRw10 by Cells Derived from a Highly Sensitized Kidney Recipient 167

ANN-MARGARET LITTLE, PHILIP A. DYER, SUSAN MARTIN, ROBERT W. G. JOHNSON, and NETAR P. MALLICK
Comparison of Serologic and Biochemical Definitions of HLA Class I Polymorphisms in Cadaver Renal Transplantation 182

JOHN M. PESANDO and MONA ABED STUCKI
AFTR: A Fifth Human B-Cell-Specific Surface Antigen 193

SHUICHI OSHIMA and DAVID D. ECKELS
Selective Expression of Class II MHC Isotypes by MLC-Activated Human T Lymphocytes 208

MARGARET A. HALL, JERRY S. S. LANCHBURY, WILSON J. BOLSOVER, KENNETH I. WELSH, and PAUL J. CICLITIRA
Celiac Disease Is Associated with an Extended HLA-DR3 Haplotype Which Includes HLA-DPw1 220

DOLORES J. SCHENDEL
On the Peptide Model of Allorecognition: Cytotoxic T Lymphocytes Recognize an Alloantigen Encoded by Two HLA-Linked Genes 229

DAVID D. ECKELS, MARY J. GEIGER, THOMAS W. SELL, and JACK A. GORSKI
Involvement of Class II β-Chain Amino Acid Residues 85 and 86 in T-Cell Allorecognition 240

KAREN ROSENKRANTZ, KARIM BHIMANI, KARL WELTE, JOCHEN BUCK, JAMES DiSANTO, ESTER LEVI, JORGE DiMARTINO, ULRICH HAMMERLING, BO DUPONT, and NEAL FLOMENBERG
A Novel Autoregulatory Cytokine Is Required for the Regulation of Autoaggressive Responses 254

GEORGE BLANCK and JACK L. STROMINGER
Cosmid Clones in the HLA-DZ and -DP Subregions 265

Volume 27, Number 4, April 1990

FUMIYA OBATA, AKIO ABE, MIDORI OHKUBO, ICHIRO ITO, TAKEHISA KANEKO, FUMIO OTANI, KOJI WATANABE, and NOBORU KASHIWAGI
Sequence Analysis and Oligonucleotide Genotyping of HLA-DR"JX6", a DR"blank" Haplotype Found in the Japanese Population 269

K. J. KAO, JUAN C. SCORNIK, and CLAUDIA F. McQUEEN
Evaluation of Individual Specificities of Class I HLA on Platelets by a Newly Developed Monoclonal Antibody 285

BRIEF COMMUNICATION
A. RAZZAQUE AHMED, EDMOND J. YUNIS, and CHESTER A. ALPER
Complotypes in Pemphigus Vulgaris: Differences Between Jewish and Non-Jewish Patients 298

SHAOKEE WU, DAN LU, MICHAEL MADDEN, CHIH-PIN LIU, NAOYUKI MIYOKAWA, FRITZ H. BACH, and THOMAS L. SAUNDERS
Full-Length DQβ cDNA Sequences of HLA-DR2/DQwl Subtypes: Genetic Interactions Between Two DQβ Loci Generate Human Class II HLA Diversity 305

VITALIA DESSI, BERTA SANCHEZ, MARISA GARZON, ROSARIO MAGARIÑO, MARÍA DOLORES MALDONADO, and ANTONIO NUÑEZ-ROLDAN
Characterization of Three Human Monoclonal Antibodies Specific for Polymorphic Class I and Class II HLA Antigens 323

MARK EGERTON, EWA PRUSKI, and LINDA M. PILARSKI
Cell Generation Within Human Thymic Subsets Defined by Selective Expression of CD45 (T200) Isoforms 333

GIOVANNA CHIMINI, GIOVANNA ANGELINI, PATRIZIA PICCIOLI, BARBARA PARODI, DANIELA DE TOTERO, and GIOVANNI BATTISTA FERRARA
Polymorphism of the HLA-DPβ Region Detected by Southern Blot Hybridization 348

M. J. NIVEN, C. CAFFREY, R. H. MOORE, J. A. SACHS, V. MOHAN, H. FESTENSTEIN, M. L. HOOVER, and G. A. HITMAN
T-Cell Receptor β-Subunit Gene Polymorphism and Autoimmune Disease 360

H. ZOLA, J. V. MELO, H. N. ZOWTYJ, A. NIKOLOUTSOPOULOS, and J. SKINNER
The Leukocyte-Common Antigen (CD45) Complex and B-Lymphocyte Activation 368

BERNHARD LANG, CRISTINA NAVARRETE, PETER R. LoGALBO, GERALD T. NEPOM, JACK SILVER, ROBERT J. WINCHESTER, and PETER K. GREGERSEN
Further DNA Sequence Microheterogeneity of the HLA-DR4/Dw13 Haplotype Group: Importance of Amino Acid Position 86 of the DRβ1 Chain for T-Cell Recognition 378
